# 1. Introduction

This guide is provided to assist Rhode Island Medicaid Providers and their Agents in the process of registering to exchange Electronic Data Interchange (EDI) transactions with Rhode Island Medicaid, to prepare for Level 6 (Specialty Line of Business) testing with RI Medicaid, and to utilize the RI Medicaid Portal, a Web enabled interface, to send and receive X12N transactions for the purpose of submitting claims for RI Title XIX Services .

## 1.1. Purpose

These specifications are to be used in conjunction with the National Electronic Data Interchange Transaction Set Implementation Guides, which can be obtained from the Washington Publishing Company at X12N Implementation Guides - HIPAA. The Rhode Island Medicaid Companion Guide provides supplemental information specific to RI Medicaid as permitted within the structures of the HIPAA transaction sets. This version of the specifications includes the Addenda released in October 2002. Specifications may be updated as necessary to reflect changes in the HIPAA standard, or changes in RI Medicaid billing requirements.

Detailed information on Program Rules, Covered Services and Billing Guidelines are part of the Title XIX Provider Manuals and Provider Updates that are available from the Provider Relations Department .

HIPAA does not mandate that only X12N transactions can be used to exchange healthcare data. Any Provider may continue to submit paper claims and receive a paper remittance advice. However, any Provider who wishes to submit claims electronically or receive an electronic remittance advice will be required to adhere to the HIPAA transaction and code set standards. The implementation of X12N will begin in September of 2003, with selected groups of Providers. After October 16 and the completion of implementation, all electronic claims received are required to be in X12N format, regardless of the date of services on the claim.

## 1.2. HIPAA Resources

The Health Insurance Portability and Accountability Act (HIPAA) was enacted on August 21, 1996. It required several provisions, one of which is “Administrative Simplification”, dealing with Health Care standards, including the Transactions and Code Sets that are the focus of this Companion Guide. Other requirements of the Administrative Simplification provision are for Privacy, Security, National Identifier Codes, and Enforcement. Some of these Requirements are already in force, and others such as National Identifier Codes, are in the development process.

All covered entities (health plans, clearinghouses and providers) are required to adhere to all aspects of the provision.

Appendix E. contains a listing of Internet Links that will provide detailed information on HIPAA.

EDS is a registered mark and the EDS logo is a trademark of Electronic Data Systems Corporation.

# 2. Registration and Testing

## 2.1. Registration for Electronic Claims Submission

Any business entity who will utilize the RI Medicaid Web Portal, Interactive Eligibility Services, or alternative electronic media, to exchange data with the RI Title XIX Medicaid Claims Adjudication System, will be required to complete a Trading Partner Agreement (TPA) with Rhode Island Department of Human Services (DHS) and its fiscal agent, Electronic Data Systems.

Trading Partners will have to supply RI Title XIX Provider numbers, Provider Names and Provider Authorizations to submit and receive specific transactions on their behalf.

The Trading Partner Agreement may be found in Appendic A. Original signed documents must be mailed to **EDS, Attn: EDI Coordinator, PO Box 2010, Warwick, RI 02887-2010.**

Assignment of the Trading Partner ID and scheduling for testing will follow the completion of the TPA. It is the responsibility of the Submitter to update their TPA's as needed to notify EDS when the list of associated RI Medicaid Providers is changed.

## 2.2. Certification and Testing

Trading Partners will be required to supply documentation that their transactions are pre- certified to meet the X12N standard.

Avenues for Submitters to obtain Pre-certification:

| | | |
|---|---|---|
| AppLabs Technologies | http://www.applabs.com/ | mailto:info@applabs.net |
| Claredi | http://www.claredi.com/ | mailto:info@claredi.com |
| Edifecs | http://www.hipaadesk.com/ | mailto:sales@edifecs.com |
| Foresight | http://www.foresightcorp.com/ | |
| HIPAA testing | http://www.hipaatesting.com/ | mailto:info@hipaatesting.com |
| Other certification services | | |
| Internal certification process completed by the vendor themselves | | |
| Use of a certified product or vendor. | | |

These companies are listed for example and information only. Their appearance here does not imply any recommendation, endorsement or affiliation with either RI Medicaid or EDS. Either external or self-certification is acceptable, documentation of either process is required.

EDS is a registered mark and the EDS logo is a trademark of Electronic Data Systems Corporation.

Rhode Island Medicaid will have two levels of testing for new submitters.

1) **Communications Protocol and Transaction Syntax Testing** - All providers will have their Communications Protocol and Transaction Syntax tested during the process of re-certification and authorization to submit transactions through the RI Medicaid Portal. The RI Department of Human Services Web Site is the access point for Providers to send transactions and receive claim status reports, remittances and eligibility. The re-certification process is scheduled to begin BEFORE the MMIS production environment will be prepared to accept HIPAA claims and there may be a gap between the time when an authorization is given and when the transaction could be submitted to production. Completion of this process will result in assignment of the security authorization required to submit transactions.

2) **End to End or UAT Testing** - EDS and the DHS will select a group of providers, vendors and submitters who will participate in end to end user testing; (User Acceptance Testing or UAT). This is complete testing including accessing the RI Medicaid Web Portal, translator processing, claim submission and the return of processing results through the translator and back to the RI Medicaid Web Portal. Our Testing Partners will have the advantage of having their formats thoroughly tested, and this will be especially valuable to larger submitters and software vendors. Please send contact information of interested participants to the RI EDI Coordinator.

Providers can save time in the authorization process by using products or services that have already been successfully tested with RI Medicaid. Contact the EDI Coordinator for RI Medicaid Trading Partner status (see Appendix D).

RI Medicaid will make available a new version of Provider Electronic Solutions billing software available to participating providers. This product has been developed by EDS for RI Medicaid. Providers utilizing the new version of Provider Electronic Solutions will only have to complete the Trading Partner Agreement, Communications Protocol Testing, and are expected to utilize training and support offered by Provider Services in conjunction with the Provider Electronic Solutions software manual to produce valid claim transactions.

EDS is a registered mark and the EDS logo is a trademark of Electronic Data Systems Corporation.

# 2.3. Translator and Data Validation Processes

All EDI files uploaded to the Sybase Translator will be subjected to two levels of edits; an initial edit process to ensure compliance with the X12N format rules, and a subsequent data validation process for RI Medicaid billing. The compliance check will include the Addenda release of October 2002.

## 2.3.1. Sybase HIPAA Compliance Check

Integrity Testing – This level of processing performed by the Sybase HIPAA Compliance map will verify the transaction (ST to SE segments) conforms to specific segment configuration in accordance with the HIPAA Implementation Guide for the type of transaction. Verification of the content related to numeric data elements, and valid date field values.

Requirement Testing - This level of processing involves the comparison of the data being validated against configurations of HIPAA implementation guides related to X12N defined standard code values along with absence or presence of segments related to the data element causing the relationship validation.

Balance Testing - If required by a particular transaction, this level of processing will determine that requirements for the balancing of claim detail amounts and quantities, with total claim amounts and quantities, are appropriately met by the data.

Situational Testing - This level of processing occurs when the instruction(s) in the HIPAA implementation guide require the presence of either a specific loop, segment, data element, or a composite data element to be present as a result of the relationship. Conversely the requirement may impose the situation for the absence of certain loops, segments, data elements, or composite data elements.

External Code Set Testing - Validation of External Code Sets will not be performed within the Sybase Compliance Checking facility as this causes duplicate maintenance efforts with the checks currently being performed with the RI Medicaid Core Adjudication platform.

The 997 Functional Acknowledgement for inbound EDI transaction sets will be returned to the Submitter after this initial edit, and will report detected errors or positively acknowledge an “accepted” transaction. The X12N Compliance check will audit the entire transaction, including data which may not be used in claims adjudication and reporting. Transactions which fail the Sybase HIPAA Compliance Check will not be processed.

## 2.3.2. Rhode Island Medicaid Data Validation Process

Data required by the RI Medicaid Management Information System (MMIS) for claim adjudication, will have format requirements. These requirements are listed in the Technical Specifications within this document. If the submitted data does not meet requirements, it may cause the claim to fail. A “Claim Accept/Reject Report” in ASCII format will report these errors and will be available for the Submitter to download. The location of invalid data in the submission will determine the impact of the rejection. An error in the Billing Provider loop is going to cause all the claims for that Provider to be rejected, while an error in the Service loop will impact only the claim which it contains.

EDS is a registered mark and the EDS logo is a trademark of Electronic Data Systems Corporation.

## 2.4. Rhode Island Medicaid Claims Adjudication

In order to receive reimbursement for services from RI Medicaid, service providers must be enrolled RI Medicaid providers, and the Recipient receiving services must be enrolled in RI Medicaid and eligible for benefits at the time of service.

Medicaid Program rules are not changed by the implementation of HIPAA transaction standards. Claims data which has passed X12N edits and Data Validation edits may still be denied if the services are non-covered or there are billing errors. Paid and denied claims results may be downloaded at the RI Web Portal by Authorized Trading Partners, as an 835 transaction. Pended claims will be identified in the 277 Unsolicited Claims Status. Submitters are encouraged to compare their submission file with the data returned on the 997, Submission Accept/Reject Report, 277 and 835 to ensure that they have accounted for all of their claims.

EDS is a registered mark and the EDS logo is a trademark of Electronic Data Systems Corporation.

# 3. 837 Institutional Technical Specifications

## 3.1. 837I – Institutional, Inpatient claims

The Institutional Inpatient Technical Specification is to be used by General Hospitals, Mental Health Institutions, and Nursing Homes to bill for Inpatient Hospital services; where RI Medicaid may be the primary, secondary or tertiary Payer.

### Instructions/General Information:

The Technical Specification document lists the data elements of the X12N 837 transaction, and provides information specific to Rhode Island Medicaid edits and requirements. The column headings for all 837 Technical Specifications are listed below, with a brief description. The page numbers given refer to the Washington Publishing Implementation Guides published in 2000.

- Segment ID: 837 Implementation Guide Segment ID
- Data Element: 837 Implementation Guide Composite Sequence ID/Data Element (not present with every segment)
- HIPAA Guide Name: Brief description of Segment ID
- Page #: 837 Implementation Guide Page Number
- HIPAA Usage: 837 Implementation Guide indicators “R” for Required if the Segment is used; “S” for Situational.
- Medicaid Note: The listed values are used to notify the provider when Rhode Island Medicaid has specific requirements for segment use or data format.
    - “Y” indicates that there is a specific instruction or limited values for RI Medicaid claims.
    - “N” indicates that there are no RI specific instructions and the Submitter must provide the data as indicated in the HIPAA Implementation Guide.
    - “X” indicates that RI Medicaid does not expect to receive the Loop/Segment in the claim file. If it is received, it will be ignored as long as its formatting passes the X12N edit.
- MMIS Instruction: Rules and information for RI Medicaid data verification.

# 3.2. 837I - Institutional, Outpatient Claims

The technical specification is to be used by Outpatient General Hospitals, Mental Health Institutions, Skilled Home Health, Hospice Services and Dialysis Facilities where Medicaid may be the primary or tertiary payer.

## Instructions/General Information:

The Technical Specification document lists the data elements of the X12N 837 transaction, and provides information specific to Rhode Island Medicaid edits and requirements. The column headings for all 837 Technical Specifications are listed below, with a brief description. The page numbers given refer to the Washington Publishing Implementation Guides published in 2000.

- Segment ID: 837 Implementation Guide Segment ID
- Data Element: 837 Implementation Guide Composite Sequence ID/Data Element (not present with every segment)
- HIPAA Guide Name: Brief description of Segment ID
- Page #: 837 Implementation Guide Page Number
- HIPAA Usage: 837 Implementation Guide indicators "R" for Required if the Segment is used; "S" for Situational.
- Medicaid Note: The listed values are used to notify the provider when Rhode Island Medicaid has specific requirements for segment use or data format.
    - "Y" indicates that there is a specific instruction or limited values for RI Medicaid claims.
    - "N" indicates that there are no RI specific instructions and the Submitter must provide the data as indicated in the HIPAA Implementation Guide.
    - "X" indicates that RI Medicaid does not expect to receive the Loop/Segment in the claim file. If it is received, it will be ignored as long as it's formatting passes the X12N edit.
- MMIS Instruction: Rules and information for RI Medicaid data verification.

# 4. 837 Professional Technical Specifications

Billing for services provided by Group and Individual Practices of RI Medicaid enrolled Service Providers (excluding Dental Practice) where Medicaid may be primary, secondary or tertiary Payer. Includes Physicians, Osteopaths, Chiropractors, Physician Assistants, Registered Nurse Practitioners, Optometrists, Podiatrists, Registered Nurses, Physical Therapists, Speech Therapists, Occupational Therapists, Psychologists, Audiologists, Certified Midwives, School Health Services, Rural Health Clinics, FQHC's, Department of Health, Adult Day Care, Home Care and Community Based Care (all Waivers), Respite Care, Opticians, Medical Supplies (DME), Non-Hospital Connected Labs, Non-Hospital Connected X-Ray, Ambulance Services, Wheelchair Vans, Medical Services Clinics, Mental Health Clinics, and Personal Care Attendants.

## Instructions/General Information:

The Technical Specification document lists the data elements of the X12N 837 transaction, and provides information specific to Rhode Island Medicaid edits and requirements. The column headings for all 837 Technical Specifications are listed below, with a brief description. The page numbers given refer to the Washington Publishing Implementation Guides published in 2000.

- Segment ID: 837 Implementation Guide Segment ID
- Data Element: 837 Implementation Guide Composite Sequence ID/Data Element (not present with every segment)
- HIPAA Guide Name: Brief description of Segment ID
- Page #: 837 Implementation Guide Page Number
- HIPAA Usage: 837 Implementation Guide indicators "R" for Required if the Segment is used; "S" for Situational.
- Medicaid Note: The listed values are used to notify the provider when Rhode Island Medicaid has specific requirements for segment use or data format.
    - "Y" indicates that there is a specific instruction or limited values for RI Medicaid claims.
    - "N" indicates that there are no RI specific instructions and the Submitter must provide the data as indicated in the HIPAA Implementation Guide.
    - "X" indicates that RI Medicaid does not expect to receive the Loop/Segment in the claim file. If it is received, it will be ignored as long as its formatting passes the X12N edit.
- MMIS Instruction: Rules and information for RI Medicaid data verification.

# 5. 837 Dental Technical Specifications

Billing for Dental services provided by Group and Individual Practices that are RI Medicaid enrolled Service Providers.

## Instructions/General Information:

The Technical Specification document lists the data elements of the X12N 837 transaction, and provides information specific to Rhode Island Medicaid edits and requirements. The column headings for all 837 Technical Specifications are listed below, with a brief description. The page numbers given refer to the Washington Publishing Implementation Guides published in 2000.

- Segment ID: 837 Implementation Guide Segment ID
- Data Element: 837 Implementation Guide Composite Sequence ID/Data Element (not present with every segment)
- HIPAA Guide Name: Brief description of Segment ID
- Page #: 837 Implementation Guide Page Number
- HIPAA Usage: 837 Implementation Guide indicators "R" for Required if the Segment is used; "S" for Situational.
- Medicaid Note: The listed values are used to notify the provider when Rhode Island Medicaid has specific requirements for segment use or data format.
    - "Y" indicates that there is a specific instruction or limited values for RI Medicaid claims.
    - "N" indicates that there are no RI specific instructions and the Submitter must provide the data as indicated in the HIPAA Implementation Guide.
    - "X" indicates that RI Medicaid does not expect to receive the Loop/Segment in the claim file. If it is received, it will be ignored as long as its formatting passes the X12N edit.
- MMIS Instruction: Rules and information for RI Medicaid data verification.

# 6. 997 Functional Acknowledgement

A report on the success or failure of a transaction to pass the HIPAA X12N format edits that are applied to all incoming 837 claim transactions. A Functional Acknowledgement is created for each X12N transaction that is uploaded to the Rhode Island Medicaid web portal. The 997 Functional Acknowledgement is available in the Download folder of the Trading Partner who submitted the 837 transaction, if the Trading Partner has indicated that they will be utilizing the 997 Functional Acknowledgement in their EDI Registration.

## Instructions/General Information:

RI Specification Field Identifiers for the 997:

- Segment ID: Implementation Guide Segment ID
- Data Element: Implementation Guide Composite Sequence ID / Data Element (not present with every segment)
- HIPAA Guide Name: Brief description of Segment ID
- Page #: Implementation Guide Page Number
- HIPAA Usage: Implementation Guide indicators “R” for Required if Segment used; “S” for Situational.
- Medicaid Note: “Y” indicates that there is a specific instruction or limited values for RI Medicaid transactions. “N” indicates that there are no RI specific instructions and the Provider must use the HIPAA
- Implementation Guide instructions. “X” indicates that RI Medicaid does not expect to send the Loop/Segment.
- MMIS Instruction: Information specific to RI Medicaid.
- The Functional Acknowledgement is generated after an uploaded transaction has been received and the Sybase HIPAA compliance check is complete. It is available for download by the original Submitter of the transaction, and identifies the original submission, and errors found by the compliance check.
- RI Medicaid delimiters: Data element separator "*", Composite sub-element separator ":", Segment terminator "~".

# 7. Claim Accept/Reject Report

Rhode Island Medicaid will produce an ASCII text file which will identify claims and service data, which has passed initial X12N syntax edits. The next step in processing is the Level 6 Specialty Line of Business Edits and this report shows the outcome of the Level 6 processing. If the claim fails the Level 6 Specialty Line of Business Edits, the detail will be displayed. It is available for download by the Trading Partner who submitted the 837 transaction.

## 7.1 CLAR210 Claim Accept/Reject Report

The CLAR210 Claim Accept/Reject Report is generated when the Sybase translator extracts data from an incoming X12N 837 file to build an input file for the Rhode Island MMIS claim load process.

The report is available for download by the original file Submitter.

The primary purpose of the report is to identify items in the claim transaction that have failed the Specialty Line of Business edits for the RI Title XIX claim processing system, and supply the Submitter with the identity of the submission, the specific errors that were encountered, and the total number of claims accepted and rejected.

Error messages are reported immediately following the set of data that contains the error. For Submitter audit use, every service line of each denied claim is listed on the report. Data that does not have an associated error message does not have errors to correct, but must be resubmitted with a corrected claim file.

Because of the hierarchical structure of X12N, errors in the EDI Control Segments, Transaction Set, Submitter Level or other higher- level loops, can impact the processing of all of the claims within them.

The EDI Control Segments ISA and IEA contain the entire file that has been uploaded, and identify the Sender, date, time, standards, version and identifier of the transaction. Within the ISA/IEA “envelope”, the GS and GE segments contain the Sender and Receiver, date and time, identification of the type of transaction (claim, remittance, functional acknowledgement), and the X12N version used.

The Transaction Set Segments ST and SE are within the GS/GE, identifying the Transaction Set and its Control Number. Within these segments, the BHT and REF segments identify the business purpose of the transaction, time, date, identification number and hierarchical structure.

Loops within this structure, provide the following information in descending order: Submitter and Receiver, Billing and Pay-To Provider, Subscriber, Claim level information and Service level information.

# 8. Unsolicited 277 – Pended Claim Report

The Pended Claim report identifies claims which have been loaded for processing within the financial cycle, but not finalized by the close of the financial cycle. Providers can contact the Communications Unit at EDS by telephone (see Appendix D) for detailed information on Pended claims.

The Pended Claim Report is generated after claims are processed and the Financial Cycle is complete. It is available for download by the Submitter who has been identified by the RI Medicaid Provider as the Entity who will be authorized to retrieve their Unsolicited 277 transactions.

## Instructions/General Information:

The Pended Claim report identifies claims which have been loaded for processing within the financial cycle, but not finalized by the close of the financial cycle. Providers can contact the Communications Unit at EDS by telephone for detailed information on Pended claims. See Appendix D for contact information.

The 277 transaction contains information on claims that have been suspended during the current financial cycle.

RI Specification Field Identifiers for the 277:

- Segment ID: Implementation Guide Segment ID
- Data Element: Implementation Guide Composite Sequence ID/Data Element (not present with every segment)
- HIPAA Guide Name: Brief description of Segment ID
- Page #: Implementation Guide Page Number
- HIPAA Usage: Implementation Guide indicators “R” for Required if Segment used; “S” for Situational.
- Medicaid Note: “Y” indicates that there is a specific instruction or limited values for RI Medicaid transactions.
- “N” indicates that there are no RI specific instructions and the Provider must use the HIPAA Implementation Guide instructions. “X” indicates that RI Medicaid does not expect to send the Loop/Segment.
- MMIS Instruction: Information specific to RI Medicaid.
- The Pended Claim Report is generated after claims are processed and the Financial Cycle is complete. It is available for download by the Submitter who has been identified by the RI Medicaid Provider as the Entity who will be authorized to retrieve their Unsolicited 277 transactions.
- RI Medicaid delimiters: Data element separator "*", Composite sub-element separator ":", Segment terminator "~".

# 9. 835 Remittance

The 835 transaction contains information on claims that have been paid, adjusted or denied during the current financial cycle.

The Remittance is generated after claims are processed and the Financial Cycle is complete. It is available for download by the Submitter who has been identified by the RI Medicaid Provider as the Entity who will be authorized to retrieve their Remittance transactions.

## Instructions/General Information:

The 835 transaction contains information on claims that have been paid, adjusted or denied during the current financial cycle.

- Segment ID: Implementation Guide Segment ID
- Data Element: Implementation Guide Composite Sequence ID/Data Element (not present with every segment)
- HIPAA Guide Name: Brief description of Segment ID
- Page #: Implementation Guide Page Number
- HIPAA Usage: Implementation Guide indicators “R” for Required if Segment used; “S” for Situational.
- Medicaid Note: “Y” indicates that there is a specific instruction or limited values for RI Medicaid transactions. “N” indicates that there are no RI specific instructions and the Provider must use the HIPAA Implementation Guide instructions. “X” indicates that RI Medicaid does not expect to send the Loop/Segment.
- MMIS Instruction: Information specific to RI Medicaid.
- The Remittance is generated after claims are processed and the Financial Cycle is complete. It is available for download by the Submitter who has been identified by the RIMedicaid Provider as the Entity who will be authorized to retrieve their Remittance transactions.
- RIMedicaid delimiters: Data element separator "*", Composite sub-element separator ":", Segment terminator "~".

# 10. Appendices

## 10.1. Appendix A: Trading Partner Agreement

### ELECTRONIC DATA INTERCHANGE
### TRADING PARTNER AGREEMENT

Based on the following recitals, the Rhode Island Department of Human Services (hereinafter referred to as "DHS"), it's fiscal agent Electronic Data Systems (hereinafter referred to as "EDS"), and

_____,

(Provider's Full Name)
(hereinafter referred to as " the Trading Partner"), enter into this Agreement to facilitate business transactions ("Transactions") by electronically transmitting and receiving data in agreed formats in substitution for conventional paper-based documents and to assure that such Transactions are not legally invalid or unenforceable as result of this use of available electronic technologies for the mutual benefit of the Trading Partners.

### ARTICLE I. PURPOSE

1.0 EDS has developed, under the State of Rhode Island Medical Assistance Program, a paperless transaction system that will process Rhode Island Medical Assistance Program electronic transactions submitted through the designated electronic media.

1.2 EDS is the fiscal agent for DHS and the State of Rhode Island Medical Assistance Program. Although EDS operates the computer systems through which electronic transactions flow, DHS retains ownership of the data itself. Trading Partners access the pipeline network over which the transmission of electronic data occurs. Accordingly providers are required to transport data to and from EDS. Additionally, contracted vendors and/or billing services must identify the providers they represent so that proper reporting of claims processing may occur.

1.3 This Agreement delineates the responsibilities of EDS and its Trading Partners in regard to the Rhode Island Medical Assistance Program.

### ARTICLE II. PARTIES

**2.0 STATE OF RHODE ISLAND DEPARTMENT OF HUMAN SERVICES**
600 New London Avenue
Cranston, RI 02920

**2.1 ELECTRONIC DATA SYSTEMS CORPORATION**
1471 Elmwood Avenue
Cranston, RI 02910

EDS is a registered mark and the EDS logo is a trademark of Electronic Data Systems Corporation.

## 2.2 TRADING PARTNER

**Name:** _____

**Address:** _____

_____

**Contact Name:** _____

**Phone Number**: _____

**Email address:** _____

**NPI / MA Provider Number:** _____

## ARTICLE III. GENERAL PROVISIONS

# 3.0 Prerequisites

Document Standards. Each party may electronically transmit to or receive from the other party any of the transaction sets listed in this Electronic Trading Partner Agreement (TPA), and transaction sets which the parties, by written amendment, agree to add to this TPA. Electronic transmission of all data ("Documents") shall be in strict accordance with the standards set forth in this TPA and as defined by the Health Insurance Portability and Accountability Act (HIPAA).

### 3.1 Third Party Service Providers

3.1.1 Documents will be transmitted electronically to each party either directly or through a contracted third-party service provider. Either party may modify its election to use, not use or change a third-party service provider upon prior written notice to the other party to this TPA.

3.1.2 Each party shall be responsible for the costs of any third-party service provider with which it contracts, unless otherwise set forth in this TPA.

### 3.2 Security Procedures

Each party shall properly institute and adhere to those security procedures including any special security procedures specified in this TPA, which are reasonably calculated to provide appropriate levels of security for the authorized transmission of documents and to protect its business records and data from improper access.

EDS is a registered mark and the EDS logo is a trademark of Electronic Data Systems Corporation.

## 3.3 Termination

This TPA shall remain in effect until terminated by either by DHS or the Trading Partner with not less than thirty (30) days prior written notice to the other party. Such notice shall specify the effective date of termination and shall not affect the respective obligations or rights of the parties arising prior to the effective date of termination. If EDS determines that the submission of documents fails to conform to the paperless transactions specifications agreed to within this TPA, or relevant guidelines governing the submission of electronic transactions then EDS may, with the approval of DHS, terminate this TPA five (5) business days after the Trading Partner has received a written termination notice from EDS. Additionally, this TPA will be terminated, with the approval of the State of Rhode Island, if any of the following events occur:

a. The State of Rhode Island requests EDS to stop processing claims for the Trading Partner or its agent.

b. The contract between EDS and the State of Rhode Island expires or terminates.

## 3.4 Modifications

This TPA constitutes the entire agreement of the parties and supersedes any previous understanding, commitment or agreements, oral or written, concerning the electronic exchange of information and or documents, all of which are hereby incorporated by reference. Any change to this Agreement will be effective only when set forth in writing and executed by all parties.

## ARTICLE IV. CONFIDENTIALITY, PRIVACY AND SECURITY

4.0 EDS and the Trading Partner will conform with all appropriate federal and state laws and regulations pertaining to the confidentiality, privacy, and security applicable to each party.

4.1 The Trading Partner agrees to safeguard all DHS information within its possession, whether verbal, written, or otherwise, received from EDS, or acquired by the Trading Partner in performance of this TPA, recognizing all such information as privileged. The use or disclosure of information concerning Rhode Island Medicaid beneficiaries shall be limited to purposes directly connected with the administration of the Rhode Island Medical Assistance Program.

## ARTICLE V. SUBMITTED CHARGES

5.0 The Trading Partner attests that all services for which payment will be claimed shall be provided in accordance with all federal and state laws pertaining to the Rhode Island Medical Assistance Program.

5.1 The Trading Partner agrees that any payments made in satisfaction of claims submitted electronically will be delivered from federal and state funds and that any false claims, statements or documents, or concealment of a material fact may be subject to prosecution applicable under federal and state law.

5.2 The Trading Partner shall allow EDS access to its claims data and shall make all reasonable efforts to ensure that authorized personnel will submit claims data. The Trading Partner also agrees to promptly notify DHS, through its agent EDS, any and all erroneous payments received by the Trading Partner regardless of the reason for such erroneous payments, and to promptly refund the subject erroneous payments to EDS.

5.3 The Trading Partner understands that all other terms and conditions of participation as set forth in the Provider Agreement Form with the Rhode Island Medical Assistance Program remain in effect and unchanged by this TPA.

EDS is a registered mark and the EDS logo is a trademark of Electronic Data Systems Corporation.

5.4 EDS, as the DHS Fiscal Agent for the Rhode Island Medical Assistance Program, has been granted the authority to approve and enroll Trading Partners participating in the electronic transmission of documents.

## Article VI Testing

**6.1** Proof that transactions meet X12N 4010A standards is required prior to testing. Please submit documentation with this completed TPA.

Please check one:

| | **Pre-Certification** | **Agency or Product Name:** |
|---|---|---|
| | Using Provider Electronic Solutions | EDS |
| | Certified by Independent Agency | |
| | Translator Compliance Check | |
| | Utilizing Certified Vendor/Clearing House | |
| | Other(Describe) | |

EDS is a registered mark and the EDS logo is a trademark of Electronic Data Systems Corporation.

## ARTICLE VII. MEDICAL TRANSACTION STANDARDS

**Rhode Island Medical Assistance Program Transaction Standards**

Selected **ASC X12N Version 4010A** standards include, as applicable, all data dictionaries, segment dictionaries and transmission controls referenced in those standards, but include only the Transaction Sets listed in the section below.
The information provided will be utilized to route transactions to the Medicaid Management Information System and back to Trading Partner directories. Remittance files (835) and Pended Claims Reports (277) will be available only to one trading partner. If authorizing one Trading Partner for claims submission and another for downloads each party must complete a separate TPA.

### Check all that apply:

| | | | |
|---|---|---|---|

# 10.2. Appendix B: Vendor Interface Specifications

## 10.2.1. Introduction

### Purpose

This document is intended for Software Vendors to use in order to develop applications to interact with the State's Medicaid system and upload and download HIPAA compliant transactions. One system supports Connecticut, Rhode Island, Vermont, and Rhode Island through the same infrastructure, but each State may have varying requirements. Contact the EDI Department in each state for assistance and details on their specific requirements.

Rhode Island

EDI Department In State toll free (800) 964-6211

Out of State or Local (401) 784-8100

EDS is a registered mark and the EDS logo is a trademark of Electronic Data Systems Corporation.

## 10.2.2. Background

### HIPAA transactions processing

Each State is prepared to accept files in the HIPAA Version 4010A approved formats. However, not all HIPAA transaction types are accepted by the file upload/download process for each state. Other transaction types may be supported in different ways by each state, such as through interactive processing. Refer to the chart below for which transaction types are currently accepted:

| State | 270 | 271 | 276/ 277 | 277 Unsolicited | 820 | 835 | 837 D | 837I | 837P | NCPDP 5.1 | NCPDP Claim Resp | 997 |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| RI | A | S | A | S | F | S | A | A | A | A | S | S |

Legend: A - The state will accept these transactions

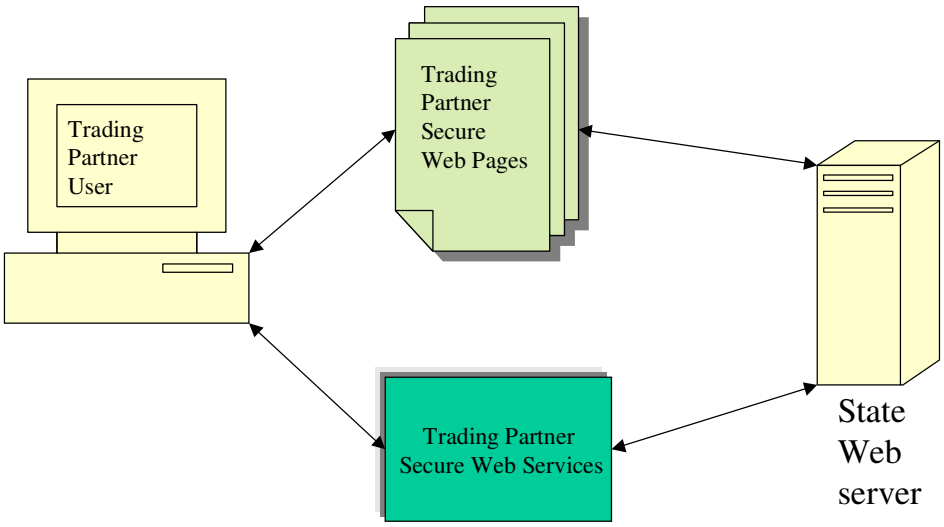
S - The state will send these transactions

F - Future Implementation , scheduled for second phase of HIPAA remediation.

EDS is a registered mark and the EDS logo is a trademark of Electronic Data Systems Corporation.

**Web Interface**

The web interface is designed to support batch file uploads and downloads. There are two ways to use this interface. The first way is to logon to the secure web site using a trading partner user id and password. This web site has web pages that allow users to upload and download files. The second way is to use a software program that runs on a users PC or on a users server that connects to the secure trading partner web services. This site sends a request using the HTTPS protocol containing information that includes the trading partner user id, password, and the request data. The request data can include a request for a listing of files available for download, a specific file name to downloaded, or a file to upload. The files can be transferred in compressed format or in standard ASCII text format. All data is transferred using the Secure Socket Layer (SSL) which encrypts the data over the network.



## Client software

The client software can be written in any language that supports HTTPS for communicating with the trading partner web services. The request transactions are formatted in XML, but the data files transferred from and to the web services are in the HIPAA standard formats. The XML data is used to support the security and general interaction with the web services.

EDS is a registered mark and the EDS logo is a trademark of Electronic Data Systems Corporation.

# 10.2.3. Web Interface Specification

## Connecting to the server

To connect to the web application you first must have a network connection that provides access to the public internet or a dial-up connection through the State's Remote Access Server (RAS). If your connection requires proxy server to connect to the Internet this needs to be configurable in your application, the sample Java demonstrates this. Once connected use the URL's in table 1 to establish a connection with the applications. It is recommended that these URL's not be hard coded as part of your application and be configurable instead. The sample program provided in Java demonstrates how to establish a connection to these URL's. All of the transactions will require the connection be made using the Secure Socket Layer (SSL). The sample program provides an example of how to do this with Java. Other programming languages such as Visual Basic have other ways to connect using SSL, such as by using the WinInet libraries that are a part of Microsoft Windows. A Test environment is also available for sending test transactions. This test environment is intended for software testing and not testing transaction file formats. Send test transaction files to the production URL using the standard X12N test identifier in the transactions file.

Table 1.

| State | Root URL |
|---|---|
| Rhode Island | Production: https://www.dhs.state.ri.us/secure |

To access the specific web applications append the URL suffixes as identified in table 2.

Table 2.

| Web Application | URL Suffix |
|---|---|
| File Upload | /secure/WebUploadFromClient |
| Directory List | /secure/WebDirectoryDownloadFromClient |
| File Download | /secure/WebDownloadFromClient |

EDS is a registered mark and the EDS logo is a trademark of Electronic Data Systems Corporation.

## HTTPS Messages

In order to interact with the web applications once a connection is established standard messages must be sent. The body of the message is formatted in simple XML. The XML messages are described in detail in the following sections. The message for uploading files uses the standard HTTP Multipart MIME type format. The Multipart MIME type format is the same format that is used to upload files through a web browser. All the other messages use a text XML format. Except for downloading a file all responses are in XML format. This XML should be parsed using standard XML parsing routines.

## File Upload Message

The file upload message must be in the HTTPS Multipart MIME type format. There are two parts to the message. The first part is user identification data in XML format and the second is the actual file being uploaded. The file being uploaded must be in an ASCII text format or zip format. The response to this message is a General Response Message. See the "General Response Message" section for details.

When using the Multipart form type data is separated by a unique string of characters that serves as the boundary between the parts of data. This number must be unique and not a part of the actual data uploaded as part of the request. In the multipart MIME type HTTP header the boundary characters are defined, see sample request. The first part of the request is an XML message which includes security information used to authenticate the user has access to perform the upload see table 3. A sample of the XML request and its associated schema are presented on the following pages. Following the XML part is the data file being uploaded. No more than one file can be uploaded at a time and the total length of the entire upload message can't exceed 16 megabytes or the whole transaction will be rejected.

See sample upload program.

URL: https:// www.dhs.state.ri.us/secure/WebUploadFromClient

EDS is a registered mark and the EDS logo is a trademark of Electronic Data Systems Corporation.

Table 3. File upload XML Message Description

| Element | Description | Length | Required |
|---|---|---|---|
| Trading Partner Id | The Trading Partner Id is used to identify whom the transaction is for. The Id, along with the User Id and Password, is used to authenticate the user.<br>Sample Data: 222222222<br>Format: Alphanumeric | 3 - 35 | Y |
| User Id | The User Id is used to authenticate the user submitting the request. The User Id must be authorized to submit for the Trading Partner Id.<br>Sample Data: xyzuser<br>Format: Alphanumeric | 3-15 | Y |
| Password | The Password is used in conjunction with the User Id to ensure the validity of the user making the request.<br>Sample Data: jmstp567<br>Format: Alphanumeric | 6-8 | Y |
| Function | This is the Upload file function name. This value must always be filled with "UPLOADFILE" to be a valid request.<br>Required value: UPLOADFILE<br>Format: Alphanumeric | 10 | Y |
| FileName | The path and name of the file being uploaded.<br>Sample Data: d:\myfile.dat<br>Format: Alphanumeric | 1 - 256 | Y |
| FileSize | Specifies the size of the file. The size is compared against the actual size of the file uploaded to ensure no data is lost. If the file is in a zipped format, this is the zipped file size.<br>Sample Data: 1022<br>Format: Numeric | 8 | Y |

## Directory List Message

The directory list message is an XML formatted message sent over HTTPS. The reason for doing a directory list is to get the name of any available files for downloading. This file name must be specified in the download message in order to get the file. There are several options that can be specified in the XML message to filter what is returned in the directory list, see table 4. There are two possible return type messages. If the directory listing is successful a directory listing response message is returned, see Table 5. The directory listing response message contains all the files meeting the criteria specified in the request message. If the directory listing request message is incorrectly formatted or there are problems processing the request a General Response message is returned with a description of the error. See the "General Response Message" section for details.

See page 36 for directory list sample program.

URL: https://www.dhs.state.ri.us/secure/WebDirectoryDownloadFromClient

Table 4. Directory Listing Request Message Description

| Element | Description | Length | Require |
|---|---|---|---|
| TradingPartnerId | The Trading Partner Id is used to identify whom the transaction is for. The Id is used to limit the list of files in the directory list to only those belonging to this Trading Partner. The Trading Partner Id is cross validated against the User Id and the User Id must be authorized to submit requests for this Trading Partner Id.<br>Sample Data: 222222222<br>Format: Alphanumeric | 3 - 35 | Y |
| UserId | The User Id is used to authenticate the user submitting the request. The User Id must be authorized to submit for the Trading Partner Id.<br>Sample Data: xyzuser<br>Format: Alphanumeric | 3-15 | Y |
| Password | The Password is used in conjunction with the User Id to ensure the validity of the user making the request.<br>Sample Data: jmstp567<br>Format: Alphanumeric | 6-8 | Y |
| Function | This is the Directory List function name. This value must always be filled with "DIRLIST" to be a valid request.<br>Required value: DIRLIST<br>Format: Alphanumeric | 7 | Y |

EDS is a registered mark and the EDS logo is a trademark of Electronic Data Systems Corporation.

| Element | Description | Length | Require |
|---|---|---|---|
| FilesToReturnCount | Specifies the maximum number of files to return in the directory list. If not included, then all files are returned.<br>Sample Data: 50<br>Format: Numeric | 0-6 | N |
| File Type | This indicates the types of files you want returned in the directory list. For example, if you only want the 997 functional acknowledgments, you would specify a file type of 997. If you wanted 997's and the 835 RA's then you specify two file types - one with 997 and the other with 835. Up to 10 file types can be specified at a time. If no file types are specified, then all types are returned.<br>Valid types may be State Specific. Here is a list of possible types:<br><br>277 – Unsolicited Claim Status Response<br>835 – Remittance Advice<br>997 – Functional Acknowledgment<br>SUB – Submission Accept/Reject Report<br><br>Format: Alphanumeric, occurs up to 10 times | 3 | N |
| File Status | Indicator to select files based on the following:<br>A = All files<br>N = New files only<br>D = Previously downloaded files only | 1 | Y |
| FilesCreatedFromDate | The file creation from date is used as a filter to only return files in the directory list, which are greater than or equal to this date. If this element is not specified, all files are listed, up through the FileCreatedToDate if specified.<br>Sample Data: 20020701<br>Format: 4 digit year, 2 digit month, 2 digit day | 8 | N |

EDS is a registered mark and the EDS logo is a trademark of Electronic Data Systems Corporation.

| Element | Description | Length | Require |
|---|---|---|---|
| FilesCreatedToDate | The file creation to date is used as a filter to only return files in the directory list which are less than or equal to this date. If this element is not specified, all files are listed, equal to and greater than the FileCreatedFromDate if specified. If neither the from or to date element is specified, all files are returned in the directory list.<br>Sample Data: 20020731<br>Format: 4 digit year, 2 digit month, 2 digit day | 8 | N |

Sample HTTP Request for Directory Listing:

```
POST /secure/WebDirectoryDownloadFromClient HTTP/1.0
Content-Type: text/xml
User-Agent: Java1.2.2
Host: www.ctmedicalprogram.com
Accept: text/html, image/gif, image/jpeg, *; q=.2, */*; q=.2
Content-length: 708

<?xml version="1.0" encoding="UTF-8"?>
<DirectoryRequest">
  <IdentificationHeader>
    <TradingPartnerId>222222222</TradingPartnerId>
    <UserId>xyzuser</UserId>
    <Password>jmstp567</Password>
  </IdentificationHeader>
  <Transaction>
    <Function>DIRLIST</Function>
    <FilesToReturnCount>50</FilesToReturnCount>
    <SelectedFileTypes>
      <FileType>997</FileType>
      <FileType>835</FileType>
    </SelectedFileTypes>
    <FileStatus>A</FileStatus>
    <FilesCreatedFromDate>20020102</FilesCreatedFromDate>
    <FilesCreatedToDate>20020103</FilesCreatedToDate>
  </Transaction>
</DirectoryRequest>
```

EDS is a registered mark and the EDS logo is a trademark of Electronic Data Systems Corporation.

## Directory Listing Request XML Schema

```
<?xml version="1.0" encoding="UTF-8"?>
<xsd:schema xmlns:xsd="http://www.w3.org/2001/XMLSchema" version="1.0" xml:lang="EN">

```

## Download a File Message

The download a file message is an XML formatted message sent over HTTPS. A file name from the directory listing response is used to request the file to download. This file name must be specified in the download message in order to get the file. The request is made using XML, see Table 6 for details. There are two possible returns from a download request. If the file requested was found and there was no problems processing the request then the data file is returned. If any problems occurred processing the request then a General Response Message is returned. The client application must recognize the difference between a file being returned and the General Response Message. See the "General Response Message" section for details.

EDS is a registered mark and the EDS logo is a trademark of Electronic Data Systems Corporation.

See download sample program.

URL: https://www.dhs.state.ri.us./secure/WebDownloadFromClient

Table 6. Download a file Message Description

| Element | Description | Length | Require |
|---|---|---|---|
| TradingPartnerId | The Trading Partner Id is used to identify whom the transaction is for. The Trading Partner Id is cross validated against the User Id and the User Id must be authorized to submit requests for this Trading Partner Id.<br>Sample Data: 222222222<br>Format: Alphanumeric | 3 - 35 | Y |
| UserId | The User Id is used to authenticate the user submitting the request. The User Id must be authorized to submit for the Trading Partner Id.<br>Sample Data: xyzuser<br>Format: Alphanumeric | 3-9 | Y |
| Password | The Password is used in conjunction with the User Id to ensure the validity of the user making the request.<br>Sample Data: jmstp567<br>Format: Alphanumeric | 6-8 | Y |
| Function | This is the File Download function name. This value must always be filled with “DOWNLOAD” to be a valid request.<br>Required value: DOWNLOAD<br>Format: Alphanumeric | 8 | Y |
| FileName | Specifies the name of the file to download. The name can be found from the directory list request.<br>Sample Data: 000000123<br>Format: Alphanumeric | 9 - 40 | N |
| FileFormat | Specifies the file format you want the file downloaded in.<br>Valid Values are:<br>TXT – Requests the file in standard ASCII Text format.<br>ZIP – Requests the file in zipped format. | 3 | Y |

## General Response Message

The General Response Message can be returned for any type request message. This response message indicates whether a request was successful or not. Some requests such as the directory request do not return a general response message, but instead a directory listing response message is returned. If however there is problem returning the directory listing response a General Response Message will be returned instead.

File Upload Response Message Description

| Element | Description | Length | Require |
|---|---|---|---|
| Message Code | Code identifying the message.<br>Sample Data: 100<br>Format: Numeric<br><br>Currently there are only two defined codes.<br>0 – Successful<br>999 – Unable to process request | 1 - 3 | Y |
| Message Desc | Descriptive message.<br>Sample Data: File was successfully uploaded.<br>Format: Alphanumeric | Up to 256 | Y |
| Message Type | Code identifying the type of message this is.<br>Sample Data: A.<br>Format: Alpha<br>Codes: A – Transaction Accepted with no errors.<br>W – Transaction failed, see message for more information and retry.<br>E – Currently the system is unavailable. | 1 | Y |
| Control Number | This is the transaction control number. This is currently only used by Upload Transactions responses.<br>Format: Numeric | 1 – 18 | N |

# 10.2.4. Sample Upload a File Program

## Upload a file program example

```
package com.eds.ne.regional.samples;

import com.sun.net.ssl.HttpsURLConnection;
import com.sun.net.ssl.HostnameVerifier;
import java.net.*;
import java.io.*;

/**
 * This program is provided as sample only as is without warranty or
 * condition of any kind, either expressed or implied, including, but
 * not limited to, the implied warranties of merchantability and
 * fitness for a particular purpose.
 *
 * This sample File Upload program connects to the web server then
 * sends it a HTTP Multi-Part message containing an XML message and
 * the file data to be uploaded.  The name of the file to be uploaded
 * is passed to the program, along with the server name.  See the
 * acceptArguments method for paramters to pass on the command line.
 * If no parameters are passed the program will prompt the user for
 * the input parameters then execute.  The upload response is simply
 * displayed in standard out.  This program differs from the other
 * sample programs as it builds the XML message in the code rather
 * than reading it from a file.
 *
 * See the vendor specifications for details of the format of the XML message
 * for a file upload.
 *
 * <P>
 *  In order to negotiate the SSL certificate of the web server the client has
 *  to have a trusted certificate in it's Java keystore file.  The web sites use
 *  GeoTrust Certificates. If this Certificate is not in your Java installations
 *  keystore you will need to install it. To install the certificate you can use
 *  the java keytool command
 *
 *  This sample program was written using JDK 1.2.2.  In order for the sample program
 *  to communicate over SSL the Java Secure Socket Extension (JSSE) needs to be installed.
 *  See http://java.sun.com/products/jsse/INSTALL.html.
 *  After installing JSSE add the following jar files must be in the class path before
 *  running the sample program: drive:/JSSE/jsse.jar;drive:/JSSE/jnet.jar;drive:/JSSE/jcert.jar
 *     <P>
 * <HR>

# 10.2.5. Directory listing sample program

## Directory Listing program example

```
package com.eds.ne.regional.samples;

import com.sun.net.ssl.HttpsURLConnection;
import com.sun.net.ssl.HostnameVerifier;
import java.net.*;
import java.io.*;

/**
 * This program is provided as sample only as is without warranty or
 * condition of any kind, either expressed or implied, including, but
 * not limited to, the implied warranties of merchantability and
 * fitness for a particular purpose.
 *
 * This sample Directory List program connects to the web server then
 * sends it an XML file containing the directory request message. The
 * name of the file with the XML message is passed to the program,
 * along with the server name.  See the acceptArguments method for
 * paramters to pass on the command line.  If no parameters are passed
 * the program will prompt the user for the input parameters then
 * execute.  The directory listing response is simply displayed in
 * standard out.
 *
 * See the vendor specifications for details of the format of the XML message
 * for a directory listing.  Below is a sample of the text that could
 * be in a file passed to this program to request a directory list.
 *
 *
 * <?xml version="1.0" encoding="UTF-8"?>
 * <DirectoryRequest>
 * <IdentificationHeader>
 *    <TradingPartnerId>222222222</TradingPartnerId>
 *    <UserId>xxx123</UserId>
 *    <Password>dfdf534</Password>
 *  </IdentificationHeader>
 *  <Transaction>
 *    <Function>DIRLIST</Function>
 *    <FilesToReturnCount>50</FilesToReturnCount>
 *    <SelectedFileTypes>
 *      <FileType>997</FileType>
 *      <FileType>835</FileType>
 *    </SelectedFileTypes>
 *    <FilesCreatedFromDate>20020102</FilesCreatedFromDate>
 *   <FilesCreatedToDate>20020103</FilesCreatedToDate>
 *  </Transaction>
 * </DirectoryRequest>
 *
 *
 * <P>
 *  In order to negotiate the SSL certificate of the web server the client has
 *  to have a trusted certificate in it's Java keystore file.  The web sites use
 *  GeoTrust Certificates. If this Certificate is not in your Java installations
 *  keystore you will need to install it. To install the certificate you can use
 *  the java keytool command
 *
 *  This sample program was written using JDK 1.2.2.  In order for the sample program
 *  to communicate over SSL the Java Secure Socket Extension (JSSE) needs to be installed.
 *  See http://java.sun.com/products/jsse/INSTALL.html.
 *  After installing JSSE add the following jar files must be in the class path before
 *  running the sample program: drive:/JSSE/jsse.jar;drive:/JSSE/jnet.jar;drive:/JSSE/jcert.jar
 *      <P>

# 10.2.6. Download a file sample program

## Download a file program example

```
package com.eds.ne.regional.samples;

import com.sun.net.ssl.HttpsURLConnection;
import com.sun.net.ssl.HostnameVerifier;
import java.net.*;
import java.io.*;

/**
 * This program is provided as sample only as is without warranty or
 * condition of any kind, either expressed or implied, including, but
 * not limited to, the implied warranties of merchantability and
 * fitness for a particular purpose.
 *
 * This sample File Download program connects to the web server then
 * sends it an XML file containing the download request message. The
 * name of the file with the XML message is passed to the program,
 * along with the server name.  See the acceptArguments method for
 * paramters to pass on the command line.  If no parameters are passed
 * the program will prompt the user for the input parameters then
 * execute.  The downloaded file is simply displayed in standard out.
 *
 * See the vendor specifications for details of the format of the XML message
 * for a file download.  Below is a sample of the text that could
 * be in a file passed to this program to request a directory list.
 *
 *
 *  <?xml version="1.0" encoding="UTF-8" ?>
 *  <DownloadRequest>
 *      <IdentificationHeader>
 *              <TradingPartnerId>222222222</TradingPartnerId>
 *              <UserId>xyzuser</UserId>
 *              <Password>jmstp567</Password>
 *      </IdentificationHeader>
 *      <Transaction>
 *              <Function>DOWNLOAD</Function>
 *              <FileName>000000123</FileName>
 *              <FileFormat>TXT</FileFormat>
 *      </Transaction>
 *  </DownloadRequest>
 *
 *
 * <P>
 *  In order to negotiate the SSL certificate of the web server the client has
 *  to have a trusted certificate in it's Java keystore file.  The web sites use
 *  GeoTrust Certificates. If this Certificate is not in your Java installations
 *  keystore you will need to install it. To install the certificate you can use
 *  the java keytool command.
 *
 *  This sample program was written using JDK 1.2.2.  In order for the sample program
 *  to communicate over SSL the Java Secure Socket Extension (JSSE) needs to be installed.
 *  See http://java.sun.com/products/jsse/INSTALL.html.
 *  After installing JSSE add the following jar files must be in the class path before
 *  running the sample program: drive:/JSSE/jsse.jar;drive:/JSSE/jnet.jar;drive:/JSSE/jcert.jar

# 10.5. Appendix E: HIPAA Internet Resources

Accredited Standards Committee (ASC X12)
Develops and maintains standards for inter-industry electronic data interchange.
http://www.x12.org/

American Dental Association (ADA)
The ADA is the source for the Dental Terminology 3rd Edition codes (CDT-3, HCPCS Level II "D" codes), and sets standards for the dental claim form.
http://www.ada.org

American Hospital Association Central Office on ICD-9-CM (AHA)
The resource for the International Classification of Diseases, Ninth Revision, Clinical Modification (ICD-9-CM) codes, used in medical transcription and billing, and for Level I HCPCS.
www.ahacentraloffice.org/

American Medical Association (AMA)
The AMA is the source for the Current Procedural Terminology 4th Edition codes (CPT-4). The AMA copyrights the CPT codes.
http://www.ama-assn.org/

Association for Electronic Health Care Transactions (AFEHCT)
An association dedicated to promoting the interchange of electronic healthcare information.
http://www.afehct.org/

Centers for Medicare and Medicaid Services (CMS)
Formerly known as HCFA, this site provides the Electronic Health Care Transactions and Code Sets Model Compliance Plan.
http://www.cms.gov/hipaa/hipaa2/

The CMS resource for information related to the Healthcare Common Procedure Coding System (HCPCS).
http://cms.hhs.gov/medicare/hcpcs/

The CMS resource for Medicaid HIPAA information related to the Administrative Simplification provision.
http://www.cms.gov/medicaid/hipaa/adminsim/

Designated Standard Maintenance Organizations (DSMO)
This site is a resource for information about the standard setting organizations, and transaction change request system.
http://www.hipaa-dsmo.org/

Health Level Seven (HL7)
One of several ANSI accredited Standards Development Organizations (SDO), and is responsible for clinical and administrative data standards.
http://www.hl7.org/

Medicaid HIPAA Compliant Concept Model (MHCCM)
This site presents the Medicaid HIPAA Compliance Concept Model, information and a toolkit.
http://www.mhccm.org/

The New Hampshire and Vermont Strategic HIPAA Implementation Plan (RIVSHIP)
Volunteer organization of hospitals, physicians, other health care providers, health plans, state health departments, and vendors. Members are working together to improve the understanding of and compliance with the Health Insurance Portability and Accountability Act of 1996 (HIPAA).

EDS is a registered mark and the EDS logo is a trademark of Electronic Data Systems Corporation.

http://www.RIvship.org/

National Uniform Billing Committee (NUBC)
NUCB is affiliated with the American Hospital Association, and develops standards for institutional claims.
http://www.nubc.org/

National Uniform Claim Committee (NUCC)
NUCC is affiliated with the American Medical Association. It develops and maintains a standardized data set for use by the non-institutional health care organizations to transmit claims and encounter information. NUCC maintains the national provider taxonomy.
http://www.nucc.org/

Office for Civil Rights (OCR)
OCR is the Health and Human Services Office responsible for enforcing the Privacy Rule under HIPAA.
http://www.hhs.gov/ocr/hipaa/

United States Department of Health and Human Services (DHHS)
This site is a resource for the Notice of Proposed Rule Making, rules and other information regarding HIPAA.
http://aspe.hhs.gov/admnsimp/

Washington Publishing Company (WPC)
WPC is a resource for HIPAA required transaction implementation guides and code sets.
http://www.wpc-edit.com/hipaa/

Workgroup for Electronic Data Interchange (WEDI)
A workgroup dedicated to improving healthcare through electronic commerce, which includes the Strategic National Implementation Process (SNIP) for complying with the administrative simplification provisions of HIPAA.
http://www.wedi.org

EDS is a registered mark and the EDS logo is a trademark of Electronic Data Systems Corporation.
